MEET YOUR CLINICIANS:

DR BART HALSBERGHE is a double board-certified equine specialist with a focus on Equine Integrated Sports Medicine and Rehabilitation, with podiatry as cornerstones. He has over 20 years experience covering all major equine disciplines. Bart is founder of Global Equine Veterinary Consulting Ltd. providing world-wide veterinary related services and co-founder of Bartek Equine offering scientifically and practically proven hoof care and shoeing solutions contributing to healthier hooves and healthier horses.

DIDIER "DJ" RONDELEZ has been a farrier for 25+ years, including 23 years as the resident farrier at University of Ghent, Belgium. Now in private practice (EquiPassioné), he specializes in shoeing sport horses and consulting on ortho- and therapeutic treatment of horses in different disciplines. He is a founder of the Belgian Farriers Educational Association and certifies farriers in the use of Twin™ Shoes.

MEET YOUR HOSTS:

3H Equine Hospital and Mobile Veterinary Service's mission is to provide the most progressive and compassionate care possible to our equine community. We offer extensive services including wellness, lameness diagnosis and treatment, reproductive/breeding, rehabilitation, and are always available 24 hours a day should an emergency arise.

Our equine veterinary staff are all lifelong horse owners and care for client horses like we care for our own. With over 20 years serving the equine community with superior care, we are committed to excellence in everything we do.

Bartek Equine is a US-based company with its core mission focused on providing products and techniques leading to better hoof and horse health. It is the innovator in the science-based development and usage of the split-shoe approach to hoof care. The company's patented Twin™ Shoe product line contributes to stronger, more balanced, and healthier hooves through combining the natural hoof flexibility of barefoot with the superior hoof protection provided by steel.

Suitable for most horse breeds, ages, and disciplines, Twin™ Shoes can be used for both preventive and therapeutic purposes in the management of hoof capsule pain and certain joint, ligament, and tendon injuries. The shoes are also well-suited for transitioning to or from barefoot hooves.

Join us on Saturday April 19 for expert insights on new and emerging hoof care best practices and solutions.
